(black base)

Note: Color samples on this chart represent the color of the metallic on top of a black pigmented epoxy. Suggested pigmented epoxy bases can be either Dura-Kote Pigmented Water Based Epoxy or Dura-Kote Pigmented Epoxy 100. Changing the base color can be done, when this is option chosen create a sample for accurate approval of finished floor design. Metallics flow organically within the Dura-Kote Epoxy 100 Clear Coat, elevation or pitch changes in a floor will cause unpredictable movement. Final color design can have variations due to methods of application by applicator. SureCrete recommends making final selection from job specific samples made in the field.
